EXPERTS IN TECHNICAL FURNITURE

Our Company.

Ferraro Arredi Tecnici is a leading name in the design and manufacture of high-quality technical furniture for professional laboratories. With over 60 years of experience, the company has grown from a small joinery workshop in the heart of Val Bormida into a trusted partner for major Italian and international organisations, championing 'Made in Italy' craftsmanship in this sector.

Our entrepreneurial spirit has driven continuous evolution in both our production capabilities and the quality of our services. Today, Ferraro Arredi Tecnici looks to the future with a clear, shared vision: **constantly innovating production technologies** and providing solutions that meet the specific needs of our clients.

Italian-made, designing and producing state-of-the-art technical furniture for professional laboratories

Thanks to our 3,000 sqm production site and a warehouse stocked for prompt delivery, we can guarantee rapid lead times while maintaining high quality standards at every stage. Our highly qualified team manages **every detail in-house — from research and development to engineering —** ensuring total control over the process and the final product.

Our ISO 9001, ISO 14001, and ISO 45001 certifications are tangible proof of our commitment to quality, safety, and sustainability. Ferraro Arredi Tecnici is the **partner supporting the evolution of tomorrow's laboratories**, offering innovative, bespoke solutions to meet future challenges.

MADE IN ITALY TRAVELS FAR

We have manufactured, distributed, and installed our technical furniture **for clients worldwide**, expanding our strategic horizons across international markets.

Under the expert and bold leadership of Fausto Ferraro, the company has exported technology, design, and construction expertise to **Europe**, the **Americas**, and the **Middle East**.

Upholding the quality of 'Made in Italy' is a responsibility we take pride in.

Regular collaboration with international partners has fuelled our growth, broadening our vision and enhancing our expertise.

This responsibility translates into meticulous attention to detail, **combining passion with a rigorous selection** of the finest raw materials to represent Italian quality at its best.

A PATH OF CONSTANT EVOLUTION

Ours is a story of innovation, reliability, and professional collaboration, which **began in 1965** in a carpentry workshop in Cairo Montenotte (SV), thanks to **Renzo** and **Giovanni Ferraro.**
With foresight into the growing needs of the chemical sector, the founders laid the foundations for a company that has continually innovated, providing cutting-edge solutions for laboratories and supporting technical and scientific progress.

A story of innovation, reliability, and professional collaboration

Over the years, Ferraro Arredi Tecnici has expanded and **modernised its facilities**, becoming a company capable of overseeing the design, engineering, and production of technical furniture.

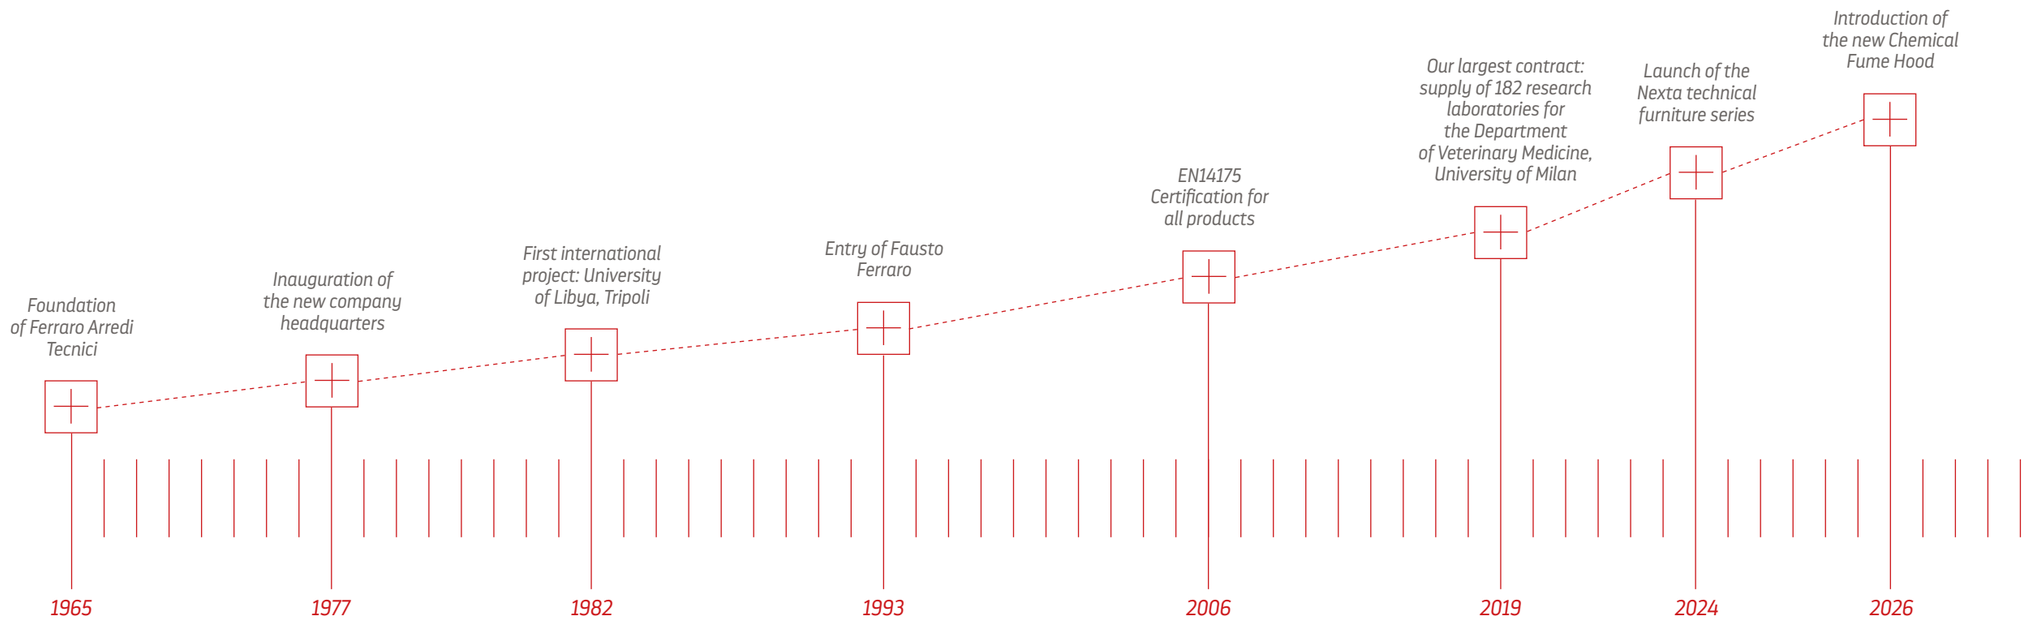
Since 1993, **Fausto Ferraro**, son of Renzo, has given a decisive impetus to this growth and continues to wisely lead the family company in its ongoing process of evolution.

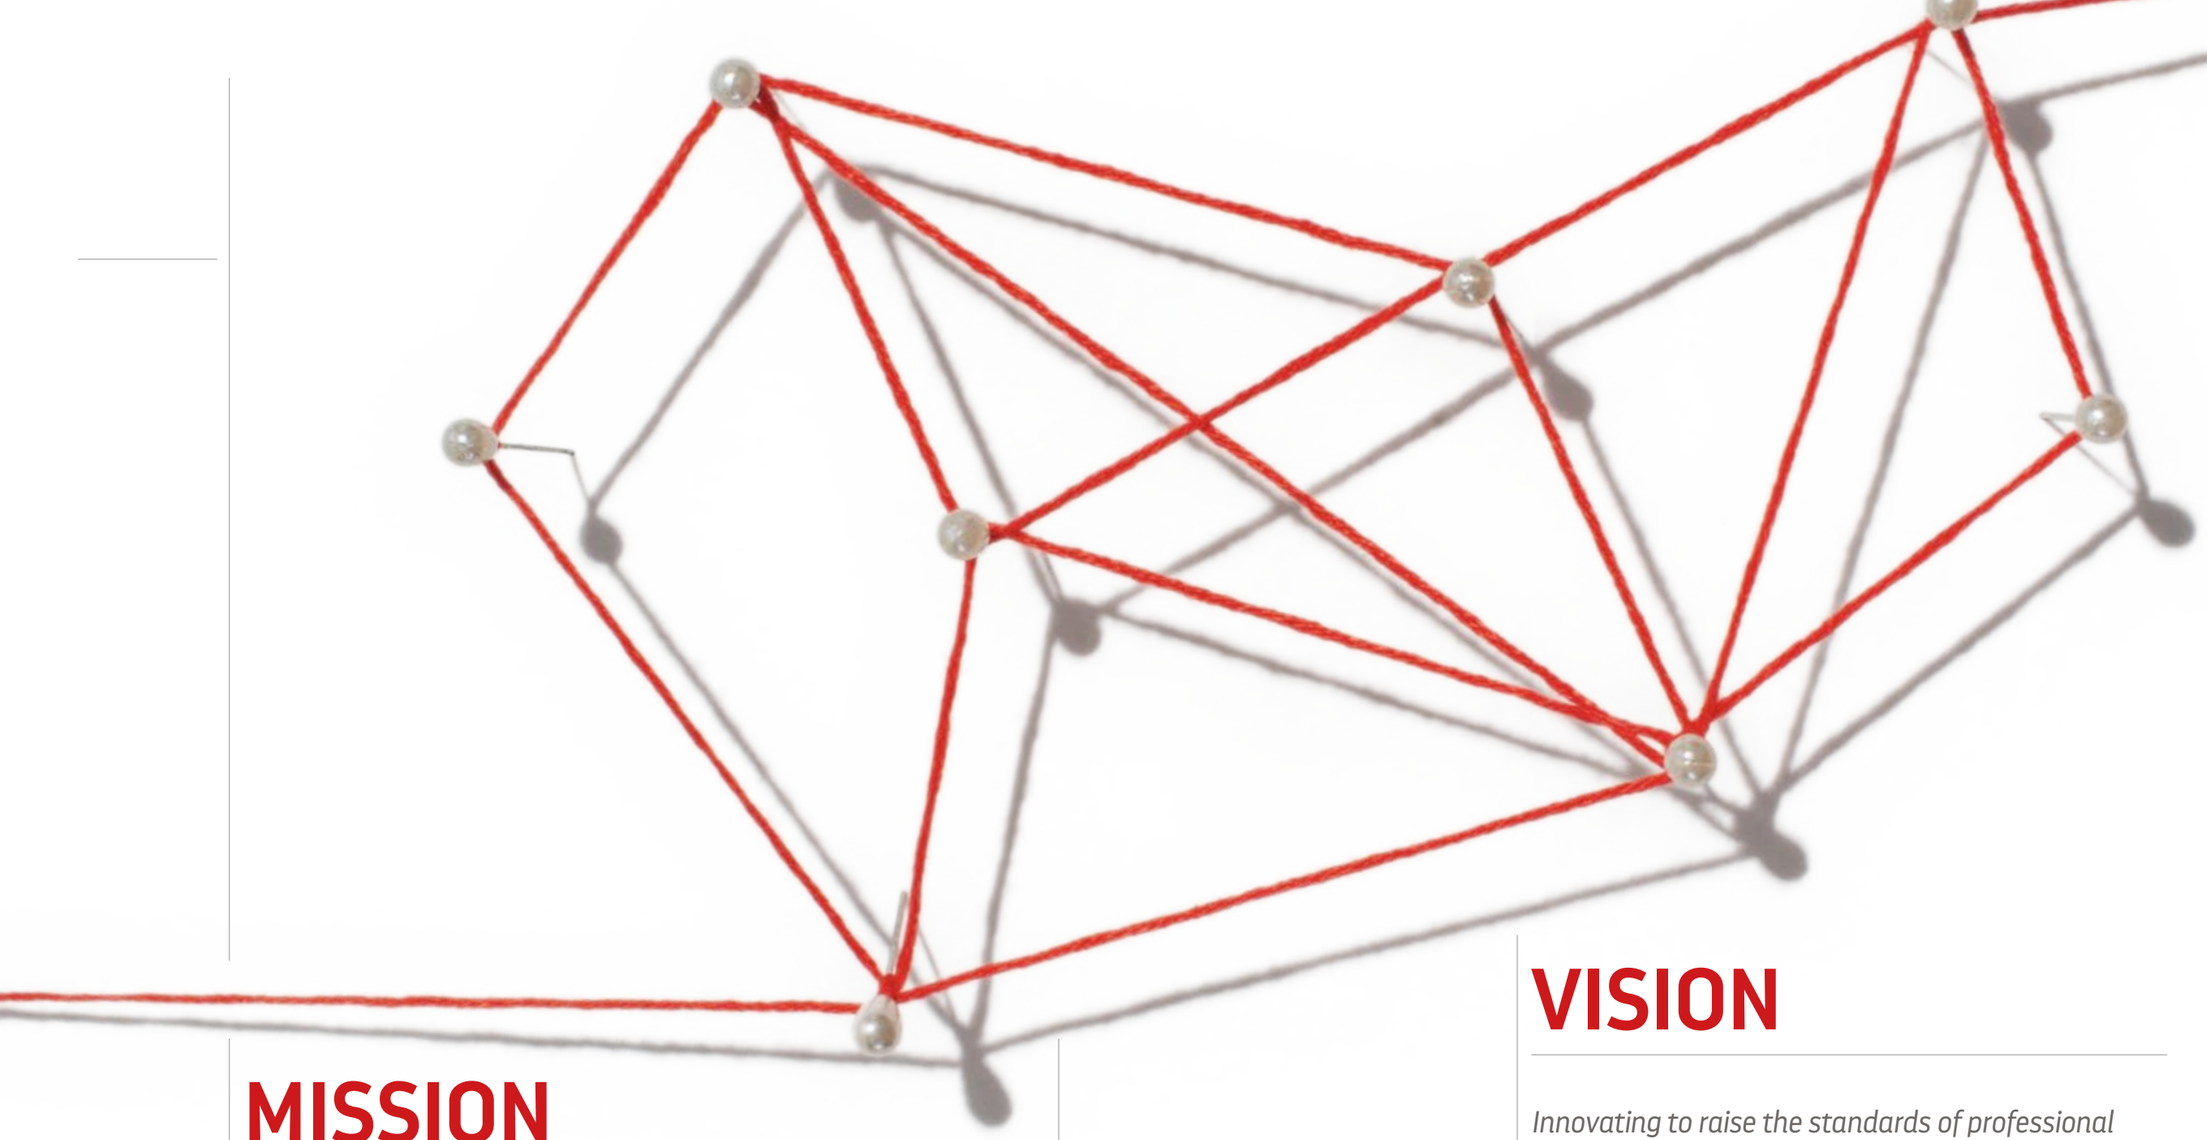
Today, with over 60 years of experience, we continue to look to the future, writing **new chapters of Italian excellence** while remaining true to the promise of quality that has defined us from the very beginning.

STEPS TOWARDS THE FUTURE

The most significant milestones along our path mark the **essential stages towards excellence**. Each decisive, rapid, and targeted step brings us closer, day by day, to our goal.

The footprints we have left tell a story of constant commitment – the true engine of our success and the heart of our corporate culture.





MISSION

We strive for excellence in every professional aspect.

From design to final testing, we oversee every phase of construction. Our working method is entirely focused on the specific needs of the end users.

Creating technical furniture requires in-depth skills, professional tools, and a careful listening phase to understand requirements. Only through this approach is it possible to achieve a comprehensive, shared project that considers all variables and meets the set objectives.

We provide our clients with advanced technologies and software that allow them to experience the laboratory remotely, improving both operator protection and production quality.

VISION

Innovating to raise the standards of professional laboratories.

The next challenge is always the most important. We look to the future of technical furniture to transform laboratories into state-of-the-art centres of value. Our drive for innovation allows us to anticipate needs and support laboratories in their research activities, facilitating the sector's constant evolution with furniture designed to meet the strictest regulatory standards.

For this reason, our Research and Development department is always working on innovative products. We offer versatile and adaptable furniture systems, extending their life cycle through the use of high-quality materials.

Our goal is to raise production standards and further reduce the environmental impact of our processes, contributing to a better future for our planet and for professional laboratories.

We use the latest energy-efficient and eco-sustainable machinery, featuring high-performance technology. Our headquarters is energy-autonomous: we produce all the energy required to sustain our processes ourselves.

THE CORE PILLARS OF OUR BUSINESS PHILOSOPHY

A corporate culture based on professional integrity.

To look towards the future, one needs a compass to show the way. Our four "cardinal points" are the deep-rooted values of our philosophy: Innovation, Sustainability, Reliability, and Listening.

These principles are part of our corporate DNA and are **reflected in every strategy, project, production line, and service we offer.**
Every team member is a guardian of these values, which define our professional and human approach.

Throughout our history, **we have adopted new technologies and evolved our processes**, but these four pillars have never changed. Like firm roots in fertile ground, they have supported us through every challenge and guided us towards major milestones.

INNOVATION

Innovation is the driving force at Ferraro AT – a mindset that shapes all our business strategies.
For us, innovating means continually expanding our know-how and enhancing the technological capabilities of our machinery, identifying new solutions that meet the demands of a constantly evolving market and anticipate the needs of the laboratories of the future with contemporary technical furniture.

LISTENING

We build relationships based on trust with our customers. Their complete satisfaction is our absolute priority. Every relationship begins with attentive listening and continues through ongoing dialogue, aimed at understanding and resolving any potential issues.

RELIABILITY

Professionalism and expertise are hallmarks of our identity. We adopt Model 231 to ensure transparent and meticulous corporate management, preventing conduct that is inconsistent with our principles.

SUSTAINABILITY

ESG criteria are integrated into our corporate strategies. Our environmental focus extends across the entire production chain, from material selection to low-impact work processes. We foster a fair and inclusive workplace culture through responsible governance aligned with our vision.

THE LOOK INSIDE THE MACHINE

Mastering technology means listening to it. Here, experience meets innovation in a constant dialogue that ensures flawless results.

TEAM

Professionals at the service of laboratories.

A winning team is built over time, **investing in the professionalism and skills of its people.** We work cohesively towards a shared goal with a consistent and professional approach.

The Ferraro Arredi Tecnici team is composed of expert professionals who, every day, turn every professional contact into an opportunity for growth, thanks to their **reliability and deep expertise.**

Technicians, engineers, architects, sales representatives, and managers are united by passion and dedication, in line with our corporate philosophy. At the top of the organisational chart is Fausto Ferraro, a leader who has successfully preserved and evolved the family entrepreneurial legacy.

"Internationalisation has allowed us to bring Ferraro's quality to the world, but we never forget our roots: commitment to every client remains the beating heart of the company. We dedicate the same care and attention to all those who choose us and will choose us."

Fausto Ferraro

360° MANUFACTURERS

We take care of laboratory construction from every angle.
Thanks to state-of-the-art production facilities and a team of experts, we manage all product engineering in-house, from raw material selection to prototyping.
This enables us to **design certified technical furniture and provide modular solutions** for our clients without compromising quality.

Our R&D department works daily to identify **the best technological solutions**, creating complete furniture series designed to meet safety and usability requirements.

The power and speed of our new CNC centre allow Ferraro Arredi Tecnici to manage an increasingly larger volume of internal orders than ever before.

Our technical office is equipped with **advanced software** for 3D digital design and fully automated CAD-CAM systems, making the entire production chain more efficient and precise.

Paneling warehouse department of over 500 sqm.

Automated panel cutting plant.
HOMAG automatic panel edging plant.

A BIESSE 3-axis numerical control automatic CNC machining center. A second latest-generation SCM MORBIDELLI 5-axis numerical control automatic CNC machining center.

Over 300 sqm of permanent exhibition of our furniture assembled on site adjacent to the office area.

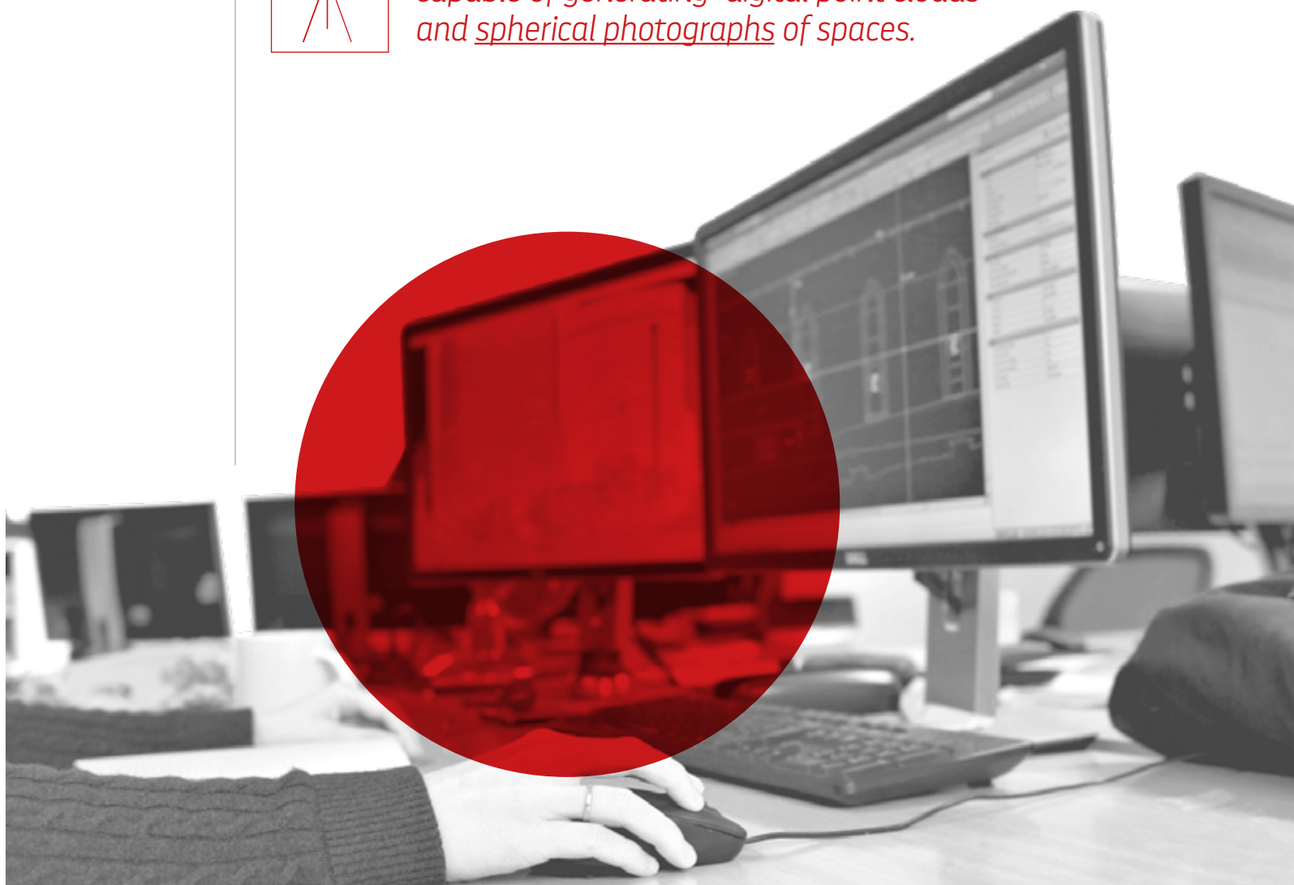
Warehouses for raw materials, semi-finished, and finished products, designed for fast order management, including storage areas for pallets ready for shipment to client sites.

Research and development cabin for testing and certification of our chemical fume hoods.

Over 300 sqm of technical, commercial, and administrative offices.

Three-dimensional digital scanning system for objects and environments, used to capture spaces for creating custom-made furniture for clients.

Laser environmental scanning system capable of generating "digital point clouds" and spherical photographs of spaces.



FURNITURE SERIES

Our technical furniture is the result of in-house research and development, aimed at creating highly performing and technologically advanced work environments.

Every product is designed with precise engineering logic, focusing on sustainability, innovation, durability, and the quality of raw materials. To support the growth of laboratories, every furniture series is modular.

Sustainability, innovation, durability, and quality of raw materials.

We fully understand the importance of laboratories for scientific and industrial purposes, and how an efficient, comfortable environment can positively impact both the daily work of operators and the quality of outcomes. For this reason, we guarantee safe and ergonomic technical furniture—tools that enhance professional environments.

The workbench can be equipped with numerous complementary components, providing the end user with a coherent and functional ecosystem: tables, technical modules, cabinets, shelves, worktops, glassware draining racks, electrical and hydraulic accessories, extraction arms, emergency showers, and pressure reducers.

CHEMICAL FUME HOODS

Ease of use, product certifications, strong brightness, and excellent visibility of the work area, combined with precise control of suction volumes, fume containment, and energy efficiency, make chemical fume hoods an indispensable laboratory tool.

Ferraro Arredi Tecnici fume hoods are collective protection devices, designed to ensure operator safety throughout all laboratory activities.

CERTIFICATIONS

Our corporate quality system, accredited by the certifying body RINA, complies with international standards for workplace safety and the eco-sustainability of both processes and products.

Ferraro Arredi Tecnici was the first Italian company in the sector to obtain CAM (Minimum Environmental Criteria) certification for its products.

All furniture in our catalogue is certified in accordance with current European and national regulations, interpreted in a more stringent sense.
A focus on ergonomics and personal well-being has led us to develop new products that have earned the Ergocert mark—a significant milestone for the company.

WHY CLIENTS CHOOSE US

1

QUALITY TECHNICAL FURNITURE
*Our internal management of the production process allows us to deliver **clear advantages in terms of construction quality.** Ferraro AT selects only the highest-quality raw materials from trusted suppliers and oversees laboratory installation with specialised technicians.*

2

EXPERIENCE
*Our technical expertise, honed over many years, enables us to provide a **service of excellence**, carefully structured to respond effectively to the evolving spatial and technological needs of laboratories.*

3

SUPPORT IN EVERY PHASE
*We offer **full coordination throughout the creation of a laboratory**, from the initial design concept to final testing. For every project, clients benefit from exclusive technical and administrative supervision provided by two highly competent technicians appointed by our company.*

4

POST-TESTING SERVICES
*We provide **warranties that exceed the minimum legal requirements.** After testing, we remain available to laboratories through maintenance programmes designed to preserve furniture performance, and we offer rapid and decisive support whenever needed.*

5

PRODUCTION CAPABILITY
***Our state-of-the-art machining centres** optimise production cycles, supported by highly precise measurement and design tools capable of generating 3D environments directly during site inspections. Our highly skilled personnel bring extensive experience in furniture installation, design, and on-site management.*
